## Committed to Sustainability

WallyPark is committed to doing our part for the environment. We were the first and are the only parking company at LAX to deploy an entire electric fleet of shuttles - replacing 40 fossil fuel burning shuttles with zero-emission, electric ones.

All of our garages have retrofitted LED bulbs to reduce electricity consumption. We've installed ticketless systems at all our locations to reduce the use of paper – and of course, our General Managers all partner with local refuse companies to recycle as much as possible.

## Eco-friendly Services for WallyParkers

As the demand for EV grows, WallyPark is building infrastructure to accommodate our guests who are also helping to create a sustainable community. We have over 400 EV charging stations and continue to add more until we have chargers at every location.

At our car wash locations, we use an oil/water separator to remove toxins from the waste water.

## Use WallyPark for ALL your travel

**You can use your corporate discount every time you fly - whether it's for business or leisure travel**

Your rate is guaranteed for every trip. Plus, with our WallyClub loyalty program, you can earn points toward free parking with every reservation! We simplify your travel so you can focus on what really matters.

*It was a pleasure to meet you!
